# ICE CREAM KIT / ICK200

## INTRODUCTION

The ICE CREAM KIT from Nostalgia Electrics™ is a fun and easy way to make sweet and delicious ice cream. This kit makes two quarts of chocolate and two quarts of vanilla ice cream using the Nostalgia Electrics™ brand ice cream makers, or other quality ice cream makers. Kit includes:

- Mix to make 2 quarts of chocolate ice cream
- Mix to make 2 quarts of vanilla ice cream
- 4lbs of rock salt separated into two 2lb. packs

## HOW TO MAKE ICE CREAM USING AN ELECTRIC ICE CREAM MAKER

1. Chill ice cream Canister until cold to the touch.
2. Add four cups of cold milk to the ICE CREAM KIT mix and stir until well combined.
3. Pour chilled ice cream mixture into the chilled Canister. Make sure that you do not fill Canister more than  $\frac{2}{3}$  full, as mixture will expand during freezing process.
4. Insert the Dasher into the Canister and make sure the bottom of the Dasher is properly aligned in the center of the Canister.
5. Place the Lid on the Canister. Place the Canister into the bottom center of the Ice Cream Maker Bucket and attach the Electric Motor to the bucket.
6. Fill the Ice Cream Bucket with a small layer of ice evenly distributed around the base of the Canister.
7. Cover the first layer of ice evenly with a thin layer of rock salt (about  $\frac{1}{2}$  cup). Continue layering the ice and rock salt until it reaches the top of the Canister.
8. Add cold water to the ice-salt mixture until the water level reaches the bottom of the drainage hole of the Ice Cream Bucket.
9. As the ice melts down 2 to 3 inches, you may add more ice and more rock salt to the Ice Cream Bucket. You should use 2 lbs of rock salt for each 2 quart batch of ice cream.
10. Plug the power cord attached to the Electric Motor into an outlet. Turn on the Electric Motor.
11. As the Canister turns, stir and mix the salt and ice together. Stir every 10-15 minutes, or as needed, while the ice cream maker is in use.
12. Turn off and unplug Electric Motor once ice cream has churned for about 30 minutes, or once the Electric Motor has stopped. Remove the Electric Motor.
13. Transfer ice cream to a freezer-safe container and freeze, or serve straight from the Canister.

## HOW TO MAKE ICE CREAM IN THE FREEZER

Simply add 4 cups of cold milk to your choice of ice cream mix flavor. Stir well and add to freezer safe container. Freeze overnight and serve.

## HELPFUL TIPS

The rock salt is not fit for human consumption. **DO NOT** eat the rock salt or use it in any food recipe. Use only as directed. Ice cream makers vary. Always follow the directions that come with your own ice cream maker for best results.
